

# Tzu-Hsuan Lin

Los Angeles, CA | (213) 706-4462 | [lintzuhs@usc.edu](mailto:lintzuhs@usc.edu) | [linkedin.com/in/tzuhsuan-lin/](https://www.linkedin.com/in/tzuhsuan-lin/) | [lintzuhsuan.github.io/Personal-Website/](https://lintzuhsuan.github.io/Personal-Website/)

## EDUCATION

<b>University of Southern California, Viterbi School of Engineering</b> <b>Master of Science in Computer Science</b>	<b>Los Angeles, CA</b> May 2023 (Expected)
<b>National Central University</b> <b>Bachelor of Science in Computer Science and Information Engineering, GPA: 3.95/4.0</b> <b>Honors</b> <ul style="list-style-type: none"><li>11th place (out of 94 groups), National Intelligent Innovation and Creation Contest, Ministry of Education, Taiwan</li><li>4th place (out of 51 groups), Competition of Special Project, Department of CSIE, NCU, Taiwan</li></ul> <b>Relevant Coursework:</b> Natural Language Processing, Internet of Things, Computer Vision, Pattern Recognition	<b>Taoyuan, Taiwan</b> Jan. 2021

## INTERNSHIP EXPERIENCE

<b>NextDrive Company</b> <b>Associate Back-End Engineer, Research and Development</b> <ul style="list-style-type: none"><li>Worked with four colleagues on designing and testing APIs for IoT products in TypeScript, PostgreSQL, and MySQL</li><li>Deployed back-end system of an IoT operating webpage to AWS</li><li>Completed three projects in groups, self-studied Jira and Docker, ensured APIs fit product features, reviewed codes, and improved performance</li></ul>	<b>Taipei, Taiwan</b> July 2020-Dec. 2020
--	--

## ACADEMIC PROJECTS

<b>Hierarchical Discourse-level Structure for Fake News Detection</b> <ul style="list-style-type: none"><li>Implemented Bidirectional LSTM with Multi-Head Attention and Transformer</li><li>Achieved an accuracy rate of 80% for fake news detection</li></ul>	Dec. 2020-Jan. 2021
<b>Fruit &amp; Vegetable Pricing App</b> <ul style="list-style-type: none"><li>Led a team of four to classify fruit and vegetable using CNN MobileNet and scrape market prices with web crawler</li><li>Received 11th place in Taiwan's national contest</li></ul>	June-Oct. 2020
<b>Web-based Time Series Anomaly Detection</b> <ul style="list-style-type: none"><li>Implemented an anomaly detection method using Variational Autoencoder in Python</li><li>Developed a user-friendly web page that allowed people without a background in machine learning to apply anomaly detection to any dataset</li><li>Customized training parameters for users, such as activation functions, optimizers, and epochs</li><li>Received 4th place in a schoolwide contest at NCU</li></ul>	Feb.-May 2020
<b>Smart Chair Sensor</b> <ul style="list-style-type: none"><li>Built a real-time system with four parts, including pressure sensor and Bluetooth sensor, Firebase, machine learning model, and webpage</li><li>Analyzed average waiting time for vacancies with LSTM model</li></ul>	Oct.-Dec. 2019

## RESEARCH EXPERIENCE

<b>National Central University</b> <b>Advanced Computing and Networking Lab</b> <ul style="list-style-type: none"><li>Worked with a group of three on designing web-based machine learning modeling construction assistant</li><li>Implemented four applications of Autoencoder, including dimensionality reduction, image denoising (DAE), feature extraction, and anomaly detection (VAE)</li></ul>	<b>Taoyuan, Taiwan</b> Aug. 2019-Jan. 2021
--	---

## PUBLICATION

Lin, T.-H.; Jiang, J.-R. Credit Card Fraud Detection with Autoencoder and Probabilistic Random Forest. *Mathematics* 2021, 9, 2683. <https://doi.org/10.3390/math9212683>

Lin, Tzu-Hsuan, and Jehn-Ruey Jiang. "Anomaly Detection with Autoencoder and Random Forest." *2020 International Computer Symposium (ICS)*. IEEE, 2020.

## SKILLS

- Programming Languages: C++, Python, MATLAB, Java, Assembly Language
- Frameworks & Libraries: TensorFlow, Pandas, OpenCV, PyTorch, scikit-learn
- Languages: Mandarin (Native), Spanish (Beginner)
